SUMMARY

Data Analyst skilled in SQL, Python, Power BI, Advanced Excel and PostgreSQL. Analyzed **6,100+ inventory transactions** across **1,800+ SKUs** and TAT data across a **24-step, 5-phase pipeline** covering **50+ clients**. Built an autonomous **NL-to-SQL analytics agent** on PostgreSQL and a **90,786-record SQL pharmacovigilance analysis**. Strong in data cleaning, data modeling, EDA, dashboards, KPI reporting and reporting automation. Live case studies on my portfolio (link above).

EXPERIENCE

Dharma Power Transmission Pvt. Ltd. (Omex Gears) Apr 2026 – Present
MIS Data Analyst *Sonipat, Haryana*

Inventory Management System (IMS) – 1,800+ SKUs, 6,100+ transactions, 8 users

- Performed stock-movement analysis on **6,100+ transactions** across **1,800+ SKUs** (19 categories, 92 item types); built single source of truth and replaced manual registers for **8 users**
- Calculated Average Daily Consumption (ADC) and set reorder thresholds (ADC x Lead Time x Safety Factor); segmented inventory into Low, Medium, Good and Over Stock, driving **950+ purchase indents**
- Mapped work-in-progress distribution across **28 process flows** (Turning, Drilling, Key Way, Hobbing, Tempering, Grinding) to identify stage-level production bottlenecks
- Built data-quality and reconciliation checks across **1,200+ SKUs** with automated flags for duplicate keys, invalid transactions and negative balances; achieved **100% location-vs-closing reconciliation with zero mismatches**

Order-to-Dispatch Flow Management System (FMS) – 24 steps, 5 phases, 90+ orders

- Solved **partial-fulfilment tracking**: order quantities split across pipeline stages (production capacity, client schedules, actual readiness), enabling batch-level visibility
- Modelled each split portion as an independent batch with its own planned-vs-actual clock and auto-reconciling parent balance, delivering stage-level stuck-sub-order visibility
- Performed **turnaround-time (TAT) analysis** across the **24-step, 5-phase pipeline** (**90+ orders, 50+ clients**) and quantified planned-vs-actual delay per stage to identify department-wise slippage
- Modelled working-hour deadlines (shift timings, working-day patterns, holiday calendar) and automated capture via Google Apps Script form workflows with source validation

PROJECTS

AI SQL Analytics Agent – *Autonomous NL-to-SQL with Self-Correction* ai-sql-analytics-agent
Python, PostgreSQL, psycopg2, Groq LLM API (gpt-oss-20b), Windows Task Scheduler; 5 tables, approx. 2,810 rows

- Built an autonomous **LLM agent** that converts natural-language questions to SQL, executes on PostgreSQL and self-corrects on failure using a multi-round tool-calling loop with **4 custom tools** (execute_sql, get_schema, inspect_table, inspect_data_quality)
- Designed a realistic e-commerce dataset with controlled data-quality issues (casing mismatches, NULLs, invalid numerics, duplicates) and validated the agent's detection and correction behavior
- Implemented **two-layer security**: validate_sql() blocking DROP, DELETE and UPDATE keywords plus a dedicated read-only PostgreSQL role; automated a daily KPI and AI-summary report via Task Scheduler

FDA Adverse Events Analysis – *SQL and Pharmacovigilance Investigation* fda-adverse-events-sql
MySQL Workbench, Excel; FDA CAERS dataset: 90,786 records (2004-2017)

- Performed end-to-end analysis of **90,786 FDA CAERS adverse-event records**: ingestion, cleaning and multi-angle investigation using advanced SQL
- Delivered key findings: Supplements contributed **48,501 reports** (**4x vs Cosmetics**); report volume grew **5x** from 2004 to 2016; females **64.9%**; seniors (60+) recorded the highest serious-case count
- Flagged **1,393 redacted death and hospitalisation entries** and cross-validated against the 2009 Hydroxycut ban for regulatory data transparency insight

Strait of Hormuz and Crude Oil Price Analysis – *Power BI Geopolitical Risk Dashboard* Strait-Of-Hormuz
Power BI, Excel; 40 years of daily WTI prices (1986-2026), 211 countries, 10,000+ rows validated against U.S. EIA

- Analyzed **40 years of daily WTI crude prices** against crisis events, Hormuz vessel traffic and consumption across **211 countries** to quantify chokepoint-to-volatility transmission; the 2026 Hormuz crisis drove an **approx. 57% price surge in 30 days**
- Built a composite **Hormuz Dependency Score** for country-level exposure, reconciled **10,000+ daily price rows** against U.S. EIA and labelled every dataset as Real, Computed or Modeled for confidence transparency

TECHNICAL SKILLS

SQL: Joins (INNER, LEFT, RIGHT), Subqueries, Window Functions (ROW_NUMBER, RANK), GROUP BY, HAVING, CTEs, CASE, Aggregations, Query Optimization

Python and Data Analysis: Pandas, psycopg2, python-dotenv, Data Cleaning, Exploratory Data Analysis (EDA), Scripted Reporting

Power BI and Data Visualization: Dashboard Design, DAX, Data Modeling, KPI Cards, Slicers, Drill-through, Power Query (M), Data Storytelling

Advanced Excel and Google Sheets: XLOOKUP, VLOOKUP, INDEX, MATCH, SUMIFS, Pivot Tables, Nested IF, ARRAYFORMULA, QUERY, Conditional Formatting

Databases and Data Quality: PostgreSQL, MySQL Workbench, pgAdmin, Schema Design, Role-based Access, Data Validation, Data Auditing, Reconciliation, Root-cause Investigation

Automation and Tools: Google Apps Script (GCP), Task Scheduler, Cron, LLM Tool-calling (Groq API), Prompt Engineering, GitHub, VS Code, Claude AI, Gemini, ChatGPT

CERTIFICATIONS AND EDUCATION

SQL Foundations – Microsoft (Coursera); Credential ID: 4TTDB8J6G2L7; Grade: **100%** verify *Aug 2026*
Healthcare Data Visualization and Decision Support – SkillUp Online (Coursera); Credential ID: Y9MP4QC7F3X1; Grade: **97.14%** verify *Jun 2026*
Fundamentals of Data Analysis – LearnQuest (Coursera); Credential ID: O24F0ALX9TWA verify *Jun 2026*

B.Sc. – Chemistry, Zoology and Botany, Siddharth University, Sant Kabir Nagar *2024; CGPA: 7.68*
Senior Secondary (Class 12 – Science), Kendriya Vidyalaya, Lucknow Cantt *2021; 77%*
Secondary (Class 10), Kendriya Vidyalaya, Lucknow Cantt *2019; 82%*
